

Logistics Management – Project Work Instructions

Purpose of the Project

This project is designed to help you understand logistics management in a real company.

You will study how a well-known Indian company manages its logistics by analysing the six major components of logistics using real data, figures, and evidence.

1. Company Selection

- Choose **only ONE Indian company**
- **Global or foreign companies are NOT allowed**
- The company should be **popular and well-documented**

Examples:

Reliance Retail, Flipkart, Amazon India, Tata Motors, ITC, Amul, Blue Dart, Delhivery, Indian Railways Logistics, BigBasket, etc.

2. Time Period for Study

You must analyse the logistics system of the company for any ONE of the following financial years:

- 2022–23
- 2023–24
- 2024–25

If exact data is **not available in the annual report**, you may use:

- Business articles
- Industry reports
- Company website information

(But screenshots + source mention are compulsory)

3. Group Formation Rules

- This is a group activity - Minimum members: 1 and Maximum members: 4
- If a student chooses to work individually, they must:
- Prepare the entire project and presentation alone
 - Be fully prepared for viva questions

4. Core Requirement: Six Components of Logistics

Your entire project must be structured around the following six components only:

1. Transportation
2. Warehousing
3. Inventory Management
4. Packaging and Labelling
5. Material Handling
6. Information Flow / Logistics Information System

Each component must be: Explained separately

5. Use of Data, Figures & Screenshots

- You must include figures, tables, charts, and screenshots
- Screenshots can be taken from:
 - Annual Reports
 - Company presentations
 - Articles or reports

Below every figure or screenshot, write the source clearly, for example:

Source: Annual Report 2023–24

Source: Company Website

Source: Business Article (Year)

6. Project Report

- The project must be prepared in **MS Word**
- Final submission must be in **PDF format**

- Upload the PDF on **Google Classroom**

Page Limit

- **Total pages:** 20 pages - (Figures, tables, screenshots are included in page count)
- **Allowed variation:** $\pm 5\%$

7. Presentation Guidelines

Along with the project file, each group must prepare a presentation.

Slide Structure

- 12 CONTENT SLIDES (Compulsory)
 - 2 slides for each logistics component ($2 \times 6 = 12$)

Additional Slides (Extra, not counted in 12)

- Introduction slide
- Conclusion / Thank You slide

8. Viva

- Viva will be conducted after the presentation
- Questions will be asked:
 - From your project content
 - From your presentation
 - From logistics concepts used in your project
